Magrunner: Dark Pulse is best played on PCs with the knowledge that it is a clean, tightly-compacted and easy-to-configure game that won't leave a trace once it's removed from PCs. Some concerns still remain, which aren't any different to many PC games tagged with boilerplate EULAs/TOSes protecting the developers more than players and the odd difficulty in manually setting tweaks outside of the game. Apart from this we do feel Magrunner is a game worth considering, although it's easy to dismiss it as a Portal-like clone for the first few tutorials that players will be ushered in. (Spoiler: It's not exactly a Portal-like clone at all).
